# Cheaper, Cleaner, Greener Solution

**RainTree Power is a renewable energy producer.**

We analyze your needs, design a renewable energy system that fits your business and location(s), install it, maintain it and operate it... without cost to you. You pay only a discounted rate for the energy you use.\*

**These state-of-the-art, thin film solar cells are just one of the new technologies RainTree Power utilizes to meet customer's demands for cheaper, cleaner, greener power.**

## Complex Made Simple

Renewable energy is a complex arena. Global problems with greenhouse gases, pollution, and unsustainable, non-renewable energy sources seem insurmountable. Particularly when you look at the high initial costs of renewable energy production. But all it really takes are small steps to get started toward using clean, renewable energy. **RainTree Power will help you take those steps.**

RainTree Power simplifies all aspects of the dream to use renewable energy. We provide world-class expertise, the latest of best-in-class technologies and a comprehensive analysis of the possibilities available. We couple this with the highest quality design and installation practices to deliver to you lower energy costs, responsible resource utilization, and eco-friendly alternatives to oil, coal and other polluting, non-renewable energy sources.

Finally, we'll be there to monitor and operate your system for you.

**How's that for simple?**

**RainTree Power delivers solar photovoltaics, solar thermal, and geothermal energy systems — whatever makes sense.**

**RTP is the renewable energy producer you've been looking for.**

# RAIN TREE POWER™

## The Answer

Renewable energy production is maturing and new solutions are available today. RainTree Power makes them immediately profitable.

Our Field Engineers will analyze your particular location and energy needs to identify feasible renewable energy sources available locally. Our Energy Production Engineers will design a custom system for your particular needs and location(s) using state-of-the-art technologies from major manufacturers throughout the world.

RainTree Power's experienced Installation Technicians then deliver and install your green energy system. Once in service our Operations Management Team will ensure that your system is operating at peak efficiency so you gain the most from your clean renewable power.

## Power Purchase Agreements

With our Power Purchase Agreements you get low per Kw costs immediately and our guaranteed low energy costs for the long-term, plus RainTree will pay for and install the renewable energy equipment (such as solar) at no cost to you!\* RainTree Power's renewable energy production systems are integrated with your local utility power supply. This makes the energy your new system produces, but which your business doesn't need, available to the local power system; everyone benefits from your eco-friendly business practices. This also means that you can lock-in your cheaper energy supply at costs below those charged by your local utility company.

## Summation

RainTree Power uses technologies from leading manufacturers around the globe to deliver tailored turnkey solutions. RainTree Power professionals analyze the current energy needs of your business and the renewable alternative energy sources locally available. Our Energy Production Engineers design a custom renewable power system specifically to fit your business and location(s). Our certified Technicians install your tailored green energy system at your location(s). Then RainTree's Production Management Team brings your system on-line, operates and maintains it at peak efficiency. We do all this at no cost to you.\* All you have to do is use the energy you're producing at a price that is lower than your local utility's!

At RainTree Power your business is important. We are not your typical power producer. We'll be there before any work starts and long after your system is in operation to ensure your power supplies are not only reliable but reduce your costs. With RainTree Power it's easy to be more green. We'll also help you tell your customers about your efforts and successes in utilizing renewable energy and all the benefits it brings to you and to them!

\* Any offers and contracts will be at the sole discretion of RainTree Energy, LLC.

Contact us and we'll get started on determining the best solutions for your renewable power needs.

RainTree Power is an affiliate of North American Roofing Services — one of the oldest, largest and most respected providers of commercial / industrial roofing solutions and services in North America. The RainTree Power - NARSI team will analyze your existing facilities and determine their condition and capacity to properly install a premier renewable energy system without the worry of future roofing issues.

**Only** the RainTree Power - North American Roofing team can make **greening** your business so easy and cost effective! Contact RainTree Power or your North American Roofing representative today and we'll get started on determining the best solutions for your renewable energy needs.
